

#### Terra, the diode pumped Nd:YLF laser

The Terra Nd:YLF laser is the smallest laser in its class. It produces high average power (>50 W) at kilohertz repetition rates. Our proprietary intracavity frequency doubling results in high conversion efficiency, without resorting to the tight focusing in the doubling crystal, which is normally necessary in an extracavity design and leads to possible optical damage. Our propriatery pump chamber design further increases the system's overall efficiency. High pulse energy, smallest M², and small jitter are all available in this extremely compact and highly ruggedized package, optimized for pumping Ti:Sapphire amplifiers.

# Diode Pumped Nd:YLF Diode Pumped Nd:YLF Diode Pumped Nd:YLF

>30 mJ pulse energy at 1kHz

Average power >50 W @ 3 kHz

Repetition rates up to 10 kHz

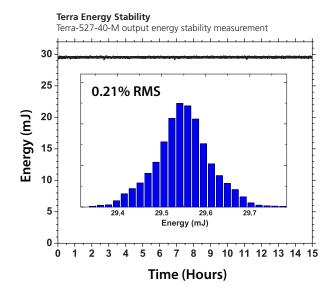

Exceptional beam pointing and power stability

Compact, rugged & hermetically sealed laser head

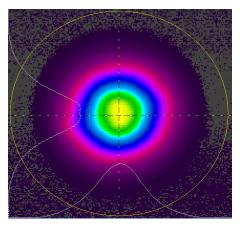

Quick & easy diode module replacement (3min)

Proprietary pump chamber design for optimal beam quality

Optimized for ultrafast amplifier pumping
